Md. Kobirul Islam, *Full Stack Developer*

Sirajganj, Bangladesh, kobirul05j@gmail.com, GitHub | LinkedIn | Portfolio

Work Experience

Backend Developer, *SM Technology, July 2025 – Present.*

- Implemented **real-time features using WebSocket** for live updates, notifications, and user interactions.
- Integrated **Stripe payment gateway** for secure payment processing, subscriptions, and transaction handling.
- Designed and managed database schemas using **Prisma ORM with MongoDB**.
- Implemented **JWT-based authentication and role-based authorization** for secure access control.
- Collaborated with frontend developers to ensure seamless API integration and performance optimization.
- Developed and maintained scalable backend APIs using **Node.js, Express.js, and TypeScript**.

TECHNICAL SKILLS

- **Front-End:** JavaScript (ES6+), React.js, Next.js, TypeScript, Redux toolkit, Tailwind CSS.
- **Back-End:** Node.js, Express.js, Prisma ORM, Mongoose, MongoDB, TypeScript, jwt, WebSocket.
- **Deployment:** VPS Deployment, Nginx (Reverse Proxy), PM2, Domain & SSL Configuration
- **Familiar:** PostgreSQL.
- **Version Control:** GitHub.
- **Tools & Platforms:** Vercel.

PROJECTS

SwiftLearn – Learning management System Live Link | Client Repo | Sever Repo

SwiftLearn is an intuitive learning platform that simplifies course, module, and lecture management, offering secure access, smooth navigation, and a responsive experience for learners across all devices.

- **Secure Authentication & Authorization** with JWT.
- **Dynamic Course Management** with add, update, and delete options features.
- **Advanced Search & Filtering** for better course browsing.
- **Technologies used:** Next.js, TypeScript, Redux, Express.js, and Mongoose.

Ezy Ticket – Online Ticket Booking Platform (Team Project) Live Link | Client Repo | Server Repo

Ezy Ticket is a full-stack, team-built ticket booking system designed to simplify the way users buy tickets for travel, events, and movies—all in one platform.

My Role: Mainly Developed the Travel Ticket System with dynamic card rendering, integrated TanStack Query for real-time data fetching, built the search functionality with route navigation and so on.

- **Centralized booking system** for movies, events, and travel in one platform.
- **Real-time Search & Filtering System** with dynamic card updates for fast browsing.
- **Individual Booking Pages** for each ticket category with clear details and CTA buttons.
- **Light/Dark Theme Toggle** for improved user experience.

Work Nest - Employee Management Live Link | Client Repo | Server Repo

Work Nest is a modern, responsive Employee Management System with secure authentication, workload tracking, HR payroll management, and an interactive admin dashboard for seamless employee operations. Here are the key features:

- **Secure Authentication & Authorization** with Firebase and JWT-based role management.
- **Employee Work Tracking System** to log, update, and monitor daily tasks.
- **HR Management Panel** for verifying employees and processing salary payments.
- **Admin Dashboard** to manage employees, promote HRs, and approve payroll requests.
- **Real-time Salary & Payment History** with a detailed breakdown and secure transactions.

EDUCATION

Diploma in Pharmacy, *SMMA IHT, Kajipur, Sirajganj* 2019 -2023

COURSES AND CERTIFICATION

Web Development Complete Course at Programming Hero June 2024 to January 2025

Next Level Web Development at Programming Hero April 2025 to November 2025
