WORK EXPERIENCE

Backend Developer, SM Technology — July 2025 – Present

- Implemented real-time features using WebSocket for live updates, notifications, and user interactions.
- Integrated Stripe payment gateway for secure payment processing, subscriptions, and transaction handling.
- Designed and managed database schemas using Prisma ORM with MongoDB.
- Implemented JWT-based authentication and role-based authorization for secure access control.
- Collaborated with frontend developers to ensure seamless API integration and performance optimization.
- Developed and maintained scalable backend APIs using Node.js, Express.js, and TypeScript.

TECHNICAL SKILLS

Front-End: JavaScript (ES6+), React.js, Next.js, TypeScript, Redux Toolkit, Tailwind CSS

Back-End: Node.js, Express.js, Prisma ORM, Mongoose, MongoDB, TypeScript, JWT, WebSocket

Deployment: VPS Deployment, Vercel, Render.

Familiar: PostgreSQL

Version Control: GitHub

Tools & Platforms: Vercel

PROJECTS

1. Together App — Social Networking Mobile Application

Play Store: [Together App](#)

Play Store: [Together App](#)

GitHub-server-link: https://github.com/kobirul5/together_app_server

Role: Backend Developer

Together App is a cross-platform social networking mobile application that enables users to connect through social feeds, real-time messaging, events, and a virtual gifting system. It also includes secure payments, subscriptions, and admin tools for community management.

Tech Stack: Flutter, Next.js (Dashboard), TypeScript, Express.js, and Prisma.

- Social feeds: memories, events, likes, comments, follows, and discovery
- Real-time chat with persistence and file upload support via WebSocket
- Virtual economy: coins, gifts, gift cards, and subscription plan

2. Tuitioni — Tutor Finder & Booking Platform

App Store: [Tuitioni](#)

GitHub-server-link: <https://github.com/kobirul5/Swift-Learn-Server>

Role: Backend Developer

Tuitioni is a premium, real-time tutor finder and booking platform backend that simplifies subject discovery, tutor scheduling, secure booking, private messaging, and payments. It features a complete role-based workflow for students, tutors, and administrators with comprehensive analytics dashboards.

Tech Stack: Flutter, Node.js, Express.js, TypeScript, Prisma ORM, MongoDB, WebSocket, and Stripe.

- Booking System: Scheduling, approvals, and ratings.
- Real-Time Chat: WebSocket messaging with media sharing.
- Stripe Payments: Secure payments with webhook support.

2. SwiftLearn — Learning Management System

Live-deploy-link: <https://swift-learn-nu.vercel.app/>

GitHub-client-link: <https://github.com/kobirul5/Swift-Learn>

GitHub-server-link: <https://github.com/kobirul5/Swift-Learn-Server>

SwiftLearn is an intuitive learning platform that simplifies course, module, and lecture management, offering secure access, smooth navigation, and a responsive experience for learners across all devices.

Tech Stack: Next.js, TypeScript, Redux, Express.js, and Mongoose.

- Secure Authentication & Authorization with JWT.
- Dynamic Course Management with add, update, and delete options features.
- Advanced Search & Filtering for better course browsing.

EDUCATION

Diploma in Pharmacy

SMMA IHT, Kajipur, Sirajganj — 2019 – 2023

COURSES AND CERTIFICATION

Web Development Complete Course, Programming Hero *(June 2024 – January 2025)*

Next Level Web Development, Programming Hero *(April 2025 – November 2025)*
